

ZERO LANDFILL CHICAGO

WE WANT YOUR EXPIRED SAMPLES!

ZeroLandfill Chicago has partnered with THE MART for over a decade! This volunteer-run organization collects expired material samples from design firms and showrooms and diverts them from the landfill by making them available to educators, students, and artists.

Each spring and fall, ZeroLandfill collects clean intact samples size 2" x 2" or larger of nearly any non-hazardous materials including but not limited to: carpet tiles, 3-ring binders, laminate, vinyl, rubber, fabric, tile, wallcovering, glass, wood, metal, and more! We host an upcycling event where community members can gather these free materials & get creative.

It's time to clean out your materials library! Sort through your expired samples and drop them off at the designated collection points at THE MART. Please keep in mind that the chance of item reuse is higher if sorted and intact. For this reason, we ask that you please group materials into categories, rather than combining everything into a single box. We also appreciate closed boxes or bags of materials rather than loose collections.

NOTE : This collection location is open to THE MART tenants only.
